

QUIQLITE PRO – White/Blue LED

QUIQLITE PRO White/Blue LED

QuiqLite PRO White/Blue LED configuration was designed as a hands-free light source for Medical personnel and Paramedics. The white LED is used for normal reading and writing applications providing more than enough light to perform night time tasks without overpowering your night vision. The Blue LED was added To help detect body fluids such as blood.

The unit is equipped with a 10 minute auto-off battery saving feature and a NEW Safety Strobe

The **SAFETY STROBE** feature provides **50+ hours** of continual flashing light for those situations when you need to be seen !

FUNCTION

1st push of the On/Off button – activates White LED only.

2nd push of the On/Off button – turns off White LED and turns on the Blue LED only.

3rd push of the On/Off button – turns all LEDs off.

NEW SAFETY STROBE

Push and hold the On/Off button for 3 seconds – activates the 50+ hour Safety Strobe
