

QUIQLITE PRO – White/Red LED

QUIQLITE PRO White/Red LED

QuiqLite PRO White/Red LED configuration was designed as a tactical hands-free light source. The white LED is used for normal reading and writing applications where the amount of light output is not a concern. The Red LED was added as a tactical light for those situations when your night vision needs to be kept in tact and your position needs to be concealed as much as possible. The Red LED is also very useful for tasks such as map reading.

The unit is equipped with a 10 minute auto-off battery saving feature and a NEW Safety Strobe

The **SAFETY STROBE** feature provides **50+ hours** of continual flashing light for those situations when you need to be seen !

FUNCTION

1st push of the On/Off button – activates White LED only.

2nd push of the On/Off button – turns off White LED and turns on the Red LED only.

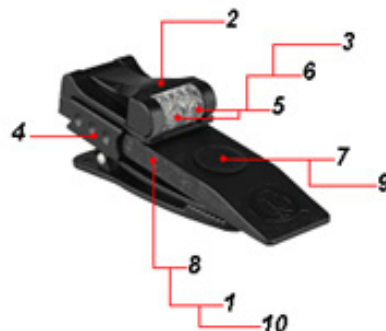

3rd push of the On/Off button – turns all LEDs off.

NEW SAFETY STROBE

Push and hold the On/Off button for 3 seconds – activates the 50+ hour Safety Strobe
