PRODUCT SM-18 SKYMATE WINDMETER

New improved version

With its convenient pocket-knife design, accuracy, features, and competitive price the Skymate is excellent value for a professional handheld wind meter ! It is waterproof, it floats, and it has a high visibility yellow case. Now also available in all black.

The pocket-knife design not only protects the unit when not in use but also ensures that the batteries are not flattened accidentally when the unit is stowed away in your bag or pocket. The unit is threaded for tripod mounting.

The SkyMate simultaneously provides precision air velocity and temperature measurements. Wind-chill is computed, maximum wind speed is recorded, and average readings can be based on intervals of 5, 10 and 13 seconds. The unique Data Lock feature allows you to hold wind speed and temperature readings, until the instrument is turned off. For increased accuracy see the new SM-WT Wind Tunnel accessory.

FEATURES

- Average windspeed over 5, 10, or 13 seconds
- Current temp & windchill
- Choose any measurement unit
- Reads in tenths
- Replaceable 400 hour lithium battery
- Data lock feature
- Replaceable plastic impeller won't corrode
- Easy to read LCD
- Threaded for tripod mounting
- Unique pocket-knife design to protect unit when not in use
- Water resistant to 3 ft
- High visibility case
- Floats

SPECIFICATIONS

ACCURACY: +/- 3% when aligned with wind's axis
WIND RANGE: .5-89 MPH
TEMP RANGE: 32° - 122°F (5° - 50°C)
OPTIONAL UNITS: Knots, MPH, KPH, M/Sec, Ft/Min, Beaufort Scale - F or C
OPERATING MODES: Current Windspeed - Average over 2 seconds,
Average Wind - 5,10, or 13 sec - Max Wind - 2 sec gust since
power on
AUTO SHUTDOWN: After 20 minutes if not done manually
POWER: CR2032 Lithium battery (included)

MEASURES: 4.8" x 1.8" x .7"
WEIGHT: 2.3 ounces with case

COLOUR: Standard - black with yellow handle.
New Model - black with black handle.
